

“...equivalent to graduation from college with major work in engineering or architecture.”

Equivalent to graduation from college: Completion of an accredited 4-year college degree or must possess the academic equivalent to graduation from an accredited college or university with a college letterhead signed by the college Registrar’s office or Dean stating so.

With major work in engineering or architecture: Possessing a degree equivalent to degree majors in engineering or architecture.

Note: Additional qualifying experience may be substituted for the required education on the basis of two years of qualifying experience equaling one academic year of education.
